

# Product Packaging Change

**Date: 19 December 2022**

**Product(s)**

1J910, 1J920, 1F910, 1F920

**Description of Change**

Packaging will consist of clean room certified poly bags that are sealed on each end. This replaces the old style where the caps were placed in hard poly tubes with caps. Difference pictured below.

**Reasons**

Streamline manufacturing and reduce packaging costs. This packaging change does not impact the tube, cap, septum, form, fit, and/or performance of the SeptaSecure products.

Updated Packaging

Old style packaging
